GETTING STARTED

1. Sign Installation

Install the LED sign with the enclosed Installation Kit.

(It is advised to wear the enclosed gloves throughout the installation to avoid leaving fingerprints on the sign)

2. Connect with parts and USB power

Connect the ① LED sign with ③ remote control unit and connect the ⑤ USB plug to the power outlet.

3. Download the LED LAMP App

You can use the **duoCo StripX** app to setup and control your LED sign.

Search **duoCo StripX** in Apple App Store or Google Play Store, scan QR code below to download the App. The ④ QR code is also printed on the ③ Remote control unit.

4. Bluetooth Pairing

Once the application has been successfully downloaded, turn on the Bluetooth function on your phone, power on the LED sign, and then open the application. Your application will automatically pair with the LED sign.

For Android phones, please ensure that you have enabled the location function and granted the necessary permission to the APP.

See Connection Instructions for further details.

5. Successfully connected

Once the connection of ADVPRO sign is established, you can control the color, brightness, and lighting effect of the LED sign with the APP.

IMPORTANT

Please wear gloves throughout the installation process to avoid leaving fingerprints on the sign

CONNECTION INSTRUCTIONS

① After launching the application, click the "Menu" button on top left corner, then click the refresh icon and the application will automatically search for nearby devices.

② Once the device has been located, click the "Bulb" button to turn on the light.

③ Click the "Chain" button to disconnect / reconnect the sign.

④ Alternatively, you can click the "+" button to create group for controlling multi signs.

In case the LED sign cannot be connected to the app:

1. Check if the power supply is functioning properly. Make sure Bluetooth is on.
2. Make sure that no other mobile phone is connected to the LED sign, as Bluetooth 4.0 only supports one-to-many connections and does not support many-to-many connections.
3. Check the Bluetooth setting in the application to see if the phone is connected to the device. If it is connected but not working, exit the application and reopen it. The application will then connect to it automatically.
4. If the app cannot connect the LED sign, or operation is not enabled, please exit the application and reopen it to try again.
5. Exit the application, restart the mobile phone, power on the LED sign, restart the application, and they will connect automatically.
